

E

- Calculates the new target rate using:
- i. Sender's estimate based on congestion cues
  - ii. the receiver's estimate
  - iii. Coverage map info directly from NCMS and from the receiver
  - iv. Any other in-path notifications

D

- i. Media Path Congestion Cues (e.g., RTCP RR/XR)
- ii. Receiver's Estimate (e.g., REMB, TMMBR)
- iii. Receiver's NCMS throughput
- iv. Receiver's Notification
