

E

Calculates the new target rate using:

- i. Sender's estimate based on congestion cues
- ii. the receiver's estimate
- iii. Coverage map info directly from NCMS and from the receiver
- iv. Any other in-path notifications

D

- i. Media path congestion cues
- ii. Receiver's Estimate (e.g., REMB, TMMBR)
- iii. Receiver's Notification (e.g., 3G Base-station)
- iv. Receiver's NCMS throughput
